WORK EXPERIENCE

ERP Support Specialist | SNASCO Holding Group of Companies (Jeddah - KSA) | 2021/10 – Present.

- Provide end-to-end ERP support for Microsoft Dynamics environment, ensuring system stability and timely resolution of user issues across finance, procurement and operations.
- Configure and maintain ERP modules (Dynamics NAV 2018), aligning system functionality with business requirements and validating changes prior to deployment.
- Act as a bridge between business users and vendors by translating operational needs into structured requirements, test cases, and validation checkpoints.
- Lead User Acceptance Testing (UAT) cycles, coordinating with stakeholders to ensure solutions meet functional expectations before release.
- Manage SQL Server environments, including data extraction, backup/restore, and performance tuning, supporting accurate data handling and system reliability.
- Perform data validation and analysis using SQL and Power Query to identify discrepancies and support finance processes such as month-end closing.
- Develop and maintain Power BI dashboards and MIS reports, enabling KPI tracking and data-driven decision-making.
- Support ERP data integrations and reporting frameworks using tools such as Jet Data Manager, ensuring consistent and automated data flow.
- Design and implement workflow automation using Power Automate and Microsoft 365 tools to streamline approvals, notifications, and routine processes.
- Administer user access and security across ERP, Power BI, including role-based permissions and Row-level security (RLS).
- Monitor system performance, identify bottlenecks, and implement improvements to enhance system responsiveness.
- Coordinate with external vendors for issue resolution, system enhancements, and upgrade activities, ensuring minimal operational disruption.
- Support compliance-related to VAT Invoice (ZATCA) Reporting and Data replication to maintain data accuracy across multiple business locations.
- Deliver user training, prepare document (BRD, process flows, user manuals) and improve system adoption across departments.

PREVIOUS WORK EXPERIENCE

- **ERP Support Executive | Asian Group of Companies PVT (Ltd) | 2019/06 – 2021/09** – Responsible for ERP Support, ERP Implementation Support, User Acceptance Testing (UAT), Business Requirements Documentation (BRD), User Manual Development, Business Process Mapping, MIS Reporting, End-User Training, and System Issue Resolution.
- **Assistant System Administrator | Colombo Institute of Research & Psychology | 2018/10 – 2019/05** – Responsible for IT help desk support, Microsoft 365 administration, Active Directory (AD) management, Windows troubleshooting, networking and firewall support, PABX administration, and end-user technical support.

EDUCATION & CERTIFICATION

E-SOFT Metro Campus Sri Lanka

- Pearson BTEC Level 5 HND Diploma in Computing and System Development (UK) (2019).

Vocational Training Authority

- Completed the Computer Hardware and Network Technician NVQ Level 04 (2016).
- Certified at Cisco Networking Academic (2015).

Technical & Other Skills

ERP & Business Applications

- Microsoft Dynamics NAV 2018 / Business Central / D365 F&O
- Foodics / QuickBooks / Oracle NetSuite (Basic Exposure)

Finance & Supply Chain

- GL / AP / AR & FA
- Month-End Closing, Financial Data Validation & Reconciliation
- Procurement, Inventory, Warehouse & Supply Chain Operations.

Data & Database Management

- Microsoft SQL Server (Advanced Querying, Joins, Stored Procedures)
- DB Administration (Backup/Restore, Index Optimize, Performance Tuning) Data Migration, Data Validation, Integrity & Troubleshooting.
- D365 F&O – DMF (Data Import/Export, Migration & Integration)

Reporting & Analytics

- Power BI (Dashboards, Data Modeling, DAX, Workspace Management, RLS) Power Query (Data Transformation, Automation & Reporting)
- Jet Reports / Jet Data Manager

Integration & Automation

- Microsoft Power Platform (Power Automate – Cloud & Desktop Flows)
- REST API Administration on IIS Manager
- Jet Data Manager (ETL, Data Warehousing & Data Automation)
- Windows Task Scheduler & Windows PowerShell

Security & Access Control

- Role-Based Access Control (RBAC) – NAV / Business Central
- AD & Microsoft 365 Administration & Power BI RLS

Microsoft Ecosystem & Tools

- Microsoft Ecosystem Including Power Apps & Azure Administration.

Core Competencies

- ERP Implementation/ User Training/ Support & Incident Management
- Business Process Analysis & Documentation
- Process Improvement & Workflow Optimization
- Stakeholder Management & Cross-Functional Collaboration
- Root Cause Analysis & Problem Solving
- Requirements Gathering & User Acceptance Testing (UAT)
- Change Management & End-User Support
- Knowledge Base Development & Documentation
- Reporting & Business Intelligence

Accomplishments

- Played a key role in the successful implementation of ZATCA E-Invoicing Tax Integration across six companies, ensuring compliance and seamless ERP operations.
- Supported EFT (Electronic Fund Transfer) integration between Mada payment terminals, POS, and ERP systems, ensuring seamless transaction processing.
- Supported the implementation of new ERP modules by coordinating with cross-functional teams, improving process efficiency and system utilization.
- Created and automated a month-end inventory closure checklist report using Excel Power Query, improving collaboration between Supply Chain and Finance teams, and supporting accurate, timely inventory period closure.
- Automated monthly P&L reporting using Excel, Power Query, and Power Automate, enabling scheduled refresh and email distribution to stakeholders.
- Built and maintained a centralized knowledge base of recurring ERP issues, reducing repeat incidents and improving resolution turnaround time.
- Improved ERP user adoption by designing and delivering structured training sessions, enhancing system usage, and reducing dependency on support.
- Transitioned Power BI reporting from Jet Warehouse to the live database, providing users with real-time operational insights and reducing reporting latency.
